NETWORKING & COMMUNICATION SERVICES

## Our Network Solutions Include

Structure Cabling (Networking: LAN / WAN)

Local Area Networks (LAN) To connect computers and related equipment within a building or campus, to enable sharing of resources such as files and printers.

Wide-Area Networks (WAN)
This is to interlink computers and related equipment in geographically diverse locations, sometimes stretching across territorial boundaries.

Virtual Private Networks (VPN)
Secure networks for inter-branch connectivity

Virtual LANs (VLAN)
Small grouping of network segments within one or more locations, operating as part of a Local Area Network (LAN).

Wireless LANs
Local Area Network built using the wireless-radio technology.

Audio-Video Conference
Audio/Video conferencing involves the transmission of audio and visual data using various VoIP technologies (VoIP and WebRTC) to connect multiple participants in different locations in a face-to-face online meeting.

Data Cabling
Data and voice cabling using structured cabling.

MOBILE APP, SOFTWARE & WEBSITE DEVELOPMENT

Software, Application & Website Development

✔ **Web development**
involves creating software applications that run on web browsers or mobile devices, respectively.

✔ **App Development**
involves creating software applications specifically designed to run on mobile devices, such as smartphones and tablets. Mainly iOS (Apple's operating system) and Android (Google's operating system) .

✔ **Website Design**
The primary purpose for websites is simply to present, share, or display some information or content online.

✔ **e-Commerce**
e-commerce has transformed the way businesses operate and how consumers shop, offering convenience, accéssibility, and a global reach that traditional brick-and-mortar stores may struggle to match.

✔ **SEO (Search Engine Optimization)**
SEO: Optimizing website content to rank higher in search engine results pages (SERPs) to increase organic (non-paid) traffic.
